

The Legend of Velbon

In the 1980s a new breed of tripod was born. This, the ultimate in tripods, was named the Mark-7. The aluminium heavy duty tripods manufactured in the Yamanashi Prefecture in Japan met the exacting requirements of the professional, and the reputation and brand value of Velbon came to be extremely well established over time. We still maintain the design principles of the Mark-7, and now it features a professional black colour finish. The craftsmanship of a real professional tripod lives on.
